

FULL BODY HARNESSSES - H11

The H11 features a rear dorsal D, front fall arrest loops and confined spaces pick up points

The H11 is a harness is a fully featured general purpose harness. It's ergonomic design means that it is a light and comfortable full body harness rated for fall arrest, confined space entry/retrieval and rescue. The H11 series features SAFERIGHT's unique rear D extension strap and fall indicator as standard, which enables the user to visually check the rear attachment point for secure lanyard connection and evidence of a previous fall. The front attachment points are designed to make rescue quicker, easier and safer. Made from hard wearing webbing and zinc plated buckles this harness is designed to withstand the rigors of the workplace. For increased corrosion protection you can specify stainless steel buckles as an option. Ideal for regular use in construction, mining and industry for tasks such as rigging, formwork, working on roofs, Elevated work platforms EWP's, confined space entry, and heavy vehicle maintenance and many other applications.

Key Features
