

HARDWARE - TRIPOD 3

Tripod Kit

The SAFERIGHT tripod kit offers versatility and convenience for confined space entry and rescue applications, with an adjustable height from 1.7 m to 3.0 m. There is a protected pulley built into the head of the tripod and the individual legs are rubber soled and are adjustable to cater for uneven surfaces. The tripod is commonly used in conjunction with the Fallright Rope Rescue System (FRS) or an Inertia Recovery Reel (IRR). The tripod comes with its own carry bag.

Key Features

- Adjustable height from 1.7 m to 3.0 m
- Legs have individual adjustability for use on uneven surfaces
- Feet can be rotated allowing spikes to push into the ground for extra stability when required
- Safe working load - 2 persons
