

OVERVIEW

This course has been designed for people to be designated as Equipment Inspectors. Participants will be competent and have the skills in identifying and assessing all defects that may occur on any equipment used within their industry. This includes application of manufacturers' recommendations where they exist and to determine remedial action for particular items of equipment.

The course can be customised and extended for a full day where Saferight Assessors can assist with inspecting and tagging actual site equipment to provide participants with additional experience and exposure in identifying defects in a real work situation. This will further validate the participants skills and confidence.

PRE-REQUISITE: Competent in Height Safety Theory to a standard equal to that of a Nationally Accredited General Height Safety Course for Operators as per AS/NZS 1891.4 : 2009, Section 2.2.11 - Training and Competency.

Saferight is a Registered Training Organisation (Provider Number 5722) and offers a range of courses in industrial safety. For more information on courses, please call our Training Department on 1800 352 335 or email training@saferight.com.au.
